

ADVANCED TECHNOLOGY DESIGNED FOR YOUR CONSTRUCTION CHALLENGES

Evolution – a portfolio of solutions for construction based on self compacting concrete (SCC) – represents the next generation of SCCs using CEMEX's latest proprietary admixture technology in combination with distinct concrete mix design principles.

Evolution makes SCC accessible and tailor-designed to the visions, needs, performance requirements, and economic constraints desired by architects, engineers, and specifiers who can witness their structure take shape, while profiting from all the benefits of SCC.

The key characteristics that distinguish **Evolution** from traditional SCC are:

- + New technology for accessible SCC
- ⊥ Recommended for highly reinforced structures
- = Suitable for challenging designs and complex formwork
- High robustness (tolerance to segregation)
- Long workability retention (at least 90 minutes guaranteed)
- ↻ Low viscosity (rapid pouring)
- ∩ Reduced shrinkage and cracking
