

CASE STUDY

Pumpable Grout

Project Name

Hatfield Borough
Council Borehole Infill
Scheme

Client

BAM Ritchie

Sector

Industrial

Date

April 2015

Products:

Pumpable Limestone
Grout

The Project

Hatfield Borough Council needed to infill large chalk boreholes that had been identified underneath a series of local homes. These boreholes represented a structural hazard to property and public safety as a sudden ground collapse in the vicinity of such a borehole was a possibility.

The Solution

BAM Ritchie approached CEMEX for a solution. We designed a Limestone Filler Grout that would provide the characteristics to flow and fill the voids effectively and safely

The Benefits

This product is a very fluid consistence fill voids through small access sections.
