

Cemento Impercem

Class 30 Portland Cement, waterproof, for general use.

VALUE PROPOSITION

- May be used for structural and masonry works, but specially for elements exposed to humidity.

ADVANTAGES

- To build and protect concrete elements from humidity in one single step.
- Helps diminish maintenance problems related to humidity: damage to painting, finishes, reinforcement elements.
- Reduces appearance of fungus and efflorescence.

APPLICATIONS

- Concrete: Slabs, foundations, columns, beams, water deposits.
- Mortar: to cover walls, leaking slab rehabilitation.

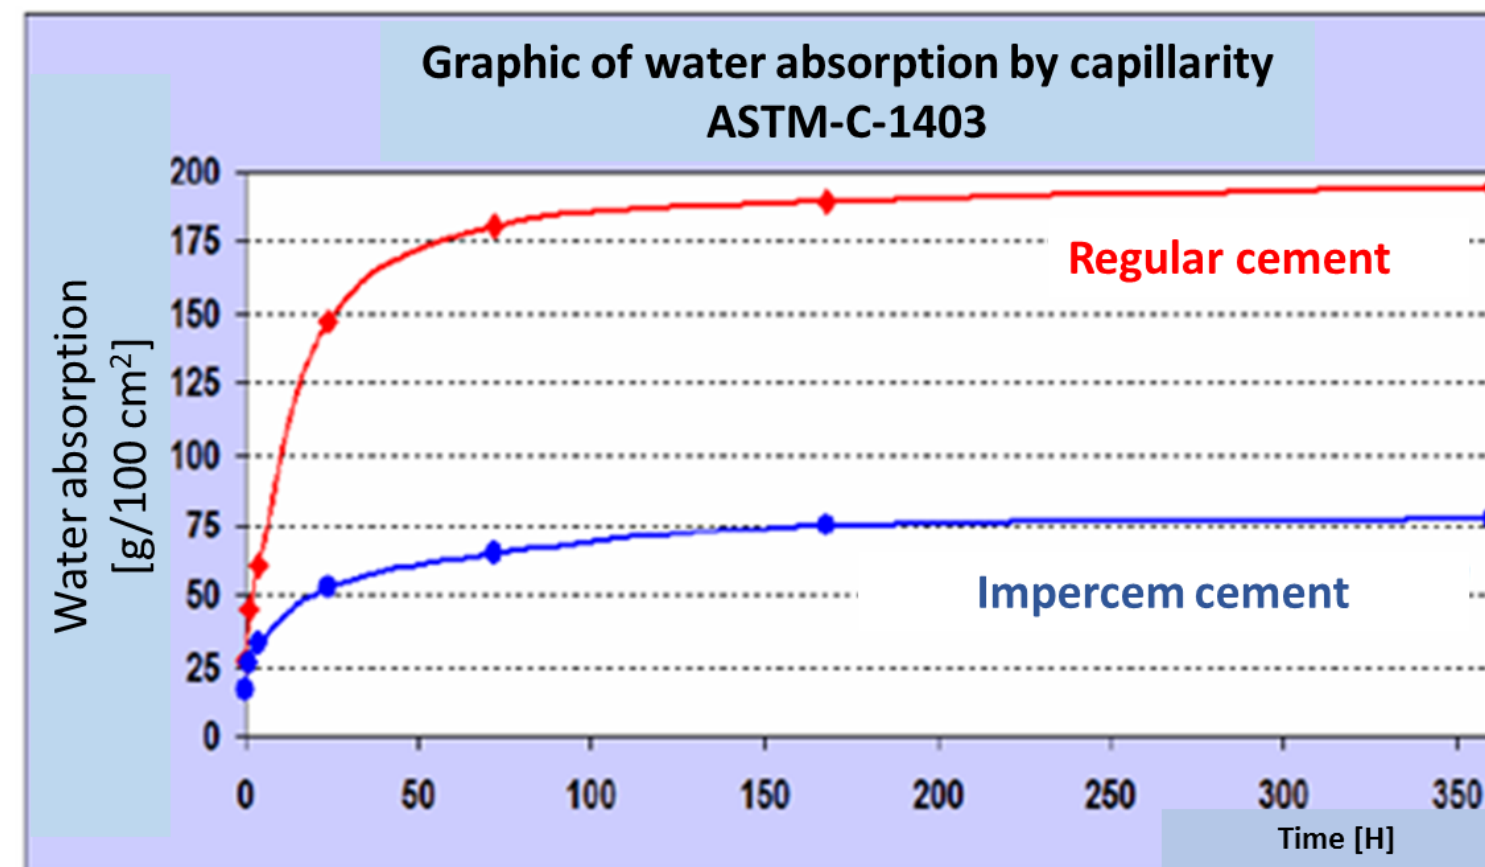

Build and protect your construction in one single step

MOTIVATION

To widen CEMEX's constructive solutions by offering a cement whose main characteristic is to avoid water leakage within cast, while maintaining the same mechanical properties of our traditional cements

TECHNICAL CHARACTERISTICS

ACTIVITIES

MÉXICO

- 4 producing plants in Mexico
- Used in social and governmental programs
- Participation in the self construction and bricks segments
